ESTABLISHED 1836

SUBMARINE CRISIS AGAIN AVERTED

Feeling At Washington That No Drastic Action Will Be Taken

President Will Deal With Situation In Comprehensive Manner

Washington, April 13.—President Wilson still remains undecided as to what action he will take in the submarine crisis with Germany. The probability that he will resort to another note as a means of dealing with the situation in a comprehensive manner has greatly increased. There is a distinct feeling that no drastic action will be taken by the United States and that the crisis is again safely passed.

Secretary Lansing declined to affirm or deny the report that another note was in contemplation. It is understood, however, that he has already gathered accumulative evidence tending to show that recent submarine attacks have jeopardized American lives, and that in addition he will endeavor to obtain from Berlin a promise that merchantmen operating near the British Isles will not be sunk without warning. In the negotiations between Secretary Lansing and Count Von Bernstorff, the German ambassador, on the recent Arabic case, Mr. Lansing pressed the point of obtaining the same guarantees for merchantmen operating in the British war zone as Germany conceded for freighters operating in the Mediterranean. Germany refused. Secretary Lansing is understood to believe that this point should now be emphasized, but, according to the German embassy, the imperial government will make no concessions along this line until Great Britain modifies the blockade.

DID NOT ATTACK SUSSEX

Germany Justifies Sinking of Five Freight Ships.

Berlin, April 13.—The German government's reply to the American inquiries regarding the recent destruction and attacks on five steamers, has been handed to Ambassador

Gerard.

Germany denies all blame in connection with the explosion on the channel steamer Sussex, but admits that German submarines sank the freighters Englishman, Manchester Engineer, Eagle Point and Berwindale. These sinkings are defended as having been legitimate and the suggestion is made to refer them to The Hague in case this "legality" is disputed by the United States government.

Germany does not understand how the United States can legally object to submarine operations aimed at freighters in the war zone which are being used to bring supplies or munitions to the enemy. Germany's pledge not to sink liners without warning any way is not held to apply to freighters where there are presumably no passengers aboard. There are no passengers on these ships, and if Americans happened to be among the crew they would be to all intents and purposes in the services of the enemy.

The conclusion drawn by the foreign office is that the Sussex, like the British steamer Tabatania, struck a British mine. The foreign office expects the United States will be entirely satisfied with the German explanation.

GERMANS EMPLOY FLAMING LIQUIDS

French Repel Infantry Attacks Near Le Mort Homme.

Paris, April 13.—The Germans attacked the French positions in the Bois des Caurettes, just west of Cumierres and between that village and Le Mort Homme. Flaming liquids were used as a cover for the attack, but the Germans were repulsed.

This was the only infantry action in the Verdun sector in the course of the day, although German guns bombarded the French lines on the west side of the river, particularly Hill 304, the region of Esnes and Le Mort Homme constantly, and also concentrated heavy fire on the Douaumont-Vaux sector. To these bombardments the French artillery replied with vigor.

The attack on the eastern bank of the Meuse is regarded by French military writers as intended only to occupy the attention of the French while the Germans are bringing up further reinforcements, in order to continue the assaults against Le Mort Homme. Hill 304 and the other obstacles confronting them on the western bank of the river.

Willis Names Mother's Day.
Columbus, April 13.—Governor Willis in a proclamation expressing a beautiful tribute to motherhood, set aside Sunday, May 14, as Mother's day. He asks that flags be displayed on public buildings and that citizens wear "a bright flower for mothers living and a white flower for mothers departed."

Claims to Be Wife of Thaw.
St. Louis, April 13.—Declaring that she was married to Harry K. Thaw in Buffalo Oct. 6, 1902, and lived with him until December, 1903, Christina Thaw of St. Louis filed suit for divorce in the circuit court here asking maintenance and the custody of their twelve-year-old daughter, Lady Gwen Evelyn Clemmens.

GERMANS FIGHT LIBEL PROCEEDINGS TO RESTORE APPAM TO BRITISH

APPAM AT NEWPORT NEWS, AND SOME OF HER SAILORS

April 18 was set some time ago as the date for the libel proceedings against the former British steamer Appam, now lying off Newport News, Va., in charge of a German prize crew. The arrival of the Appam in American waters, after her capture by the German sea raider Moewe, created a sensation.

Commanding the Moewe and fighting the attempt to return her to her original British owners, asserts that the Appam was in an unseaworthy condition when she put into Hampton Roads on Feb. 1 and he had a right

to seek refuge in an American port. He reported a few days ago that the vessel was leaking badly with four feet of water in her hold. Berg says she was damaged by going ashore off Dakar, Africa, just before her capture by the German raider Moewe.

The position of the United States is that subjects of a belligerent government may not be removed from an American vessel on the high seas—even though they properly may be considered military persons but not actually members of the armed forces.

The note was made public by the state department. It follows the line of argument previously indicated, and contends that the persons were not clothed with the immunity which would attach to enemy subjects who merely were traveling.

Great Britain alleges that the prize-catchers were engaged for some time past in the collection and transmission of arms and ammunition, both for clandestine transmission to India and, if possible, for the arming of a ship to play the part of a far eastern Moewe, and were bound for Manila to continue their work, having been exposed to the British authorities at Shanghai.

The neutrality of the United States would have been compromised, the note contends, had the prisoners performed the acts they had in contemplation. Their acts, it is contended, deprived them of protection from the American flag, under which they were sailing.

The British government argues that the removals were perfectly justified and trusts that the United States will not feel further disposed to contend the action.

STRIKE AT ALLIANCE
Alliance, O., April 13.—Interurban cars and Alliance city lines are tied up following a strike by sixty-one employees of the Star Electric and Cleveland, Alliance and Maumoning Valley railroads. The men are demanding increases ranging from 8 to 20 per cent and recognition of the Amalgamated Association of Street and Electric Railway Employees. Their present wage is from 21 to 27 cents an hour.

LEPER LOCATED
Dayton, O., April 13.—This city has a genuine case of leprosy. Jacques J. Vasquez, a tailor, is the victim. The discovery was made by the board of health a few days ago, but the fact was suppressed until the state board of health had passed upon the question. That body confirmed the diagnosis of the Dayton board.

CONGESTION AT TOLEDO
Toledo, April 13.—The congested condition of freight here led to the establishment of temporary embargoes against shipments from nearby towns. The New York Central declared an embargo of three days on goods being shipped on Ohio lines. The congestion is mainly on business houses. All Toledo roads are practically in the same difficulty, it was announced.

SKULL FRACTURED
Toledo, April 13.—Mrs. Joseph Bealeski, seventy-five, was run down by a motorcycle and her skull fractured. Ignatz Nowinski, the motorcycle driver, is held by the police, pending the outcome of Mrs. Bealeski's injuries.

POISON IS FOUND IN MEXICAN STREAMS

El Paso, Tex., April 13.—Cyanide of potassium, one of the deadliest of poisons, was found in many of the small streams in the Sierra Madre when the American forces first marched through that section on the hunt for Pancho Villa and his bandits. Carcasses of dead animals had also been dragged into many of the water courses to contaminate the water.

This information was confirmed by a chemist, who accompanied the American troops on their expedition for the purpose of analyzing the water. The cyanide of potassium was found in one stream in such amount to have killed every man in the expedition if the soldiers had drunk of the water before an analysis had been made.

Boys Suspected of Burglary.
Marion, O., April 13.—Bloodhounds were put on the trail of burglars who entered the Thibaults & Mautz store and stole \$300 worth of razors and knives. Boys are suspected. The same store was entered a week ago.

Theater Boat Sinks.
Cincinnati, April 13.—The theater boat "New Idea," a floating moving picture vessel, sunk in the Ohio river, after it crashed head-on onto a pier of the Southern bridge, near the Kentucky shore.

GERMAN PRISONER'S CLAIM; CAN MAKE DYESTUFFS
Columbus, April 13.—Dr. Emerich Ritter, self-confessed German confidential agent, will show at the pentagon that he can make dyestuffs, and also produce a very high quality of gasoline.

Dr. Ritter is a skilled chemist and asserts he is the inventor of "liquid fire." "I worked in a German dye factory as confidential chemist and I positively know the process," said Dr. Ritter.

Mrs. Ritter, wife of the prisoner, is on her way to Columbus from Cleveland with small quantities of material with which Dr. Ritter declared he will demonstrate that valuable dyestuffs, now so scarce in this country, can be made from cheap products.

Warden Thomas also has given him permission to work on his plan of abstracting gasoline of a high quality, non-volatile, from natural gas. Dr. Ritter was arrested in Cleveland last

fall for alleged complicity in the Welland canal plots. The charge was later changed to carrying concealed weapons.

Several mining companies in the region reported thefts of this deadly poison from their concentrating plants.

Boys Suspected of Burglary.
Marion, O., April 13.—Bloodhounds were put on the trail of burglars who entered the Thibaults & Mautz store and stole \$300 worth of razors and knives. Boys are suspected. The same store was entered a week ago.

Theater Boat Sinks.
Cincinnati, April 13.—The theater boat "New Idea," a floating moving picture vessel, sunk in the Ohio river, after it crashed head-on onto a pier of the Southern bridge, near the Kentucky shore.

Boys Suspected of Burglary.
Marion, O., April 13.—Bloodhounds were put on the trail of burglars who entered the Thibaults & Mautz store and stole \$300 worth of razors and knives. Boys are suspected. The same store was entered a week ago.

DOES NOT SATISFY UNITED STATES

British Note on Seizure of Passengers From American Boat.

TO CONTINUE NEGOTIATIONS

No Precedent, in Secretary Lansing's Opinion, Which Would Justify the Seizure On the Ground That the Men Had Engaged in Plots in the Far East—Great Britain's Contention.

Washington, April 13.—Great Britain's note on the seizure of thirty-eight Austrians, Germans and Turks from the American steamer Caina, near Shanghai, does not close the case to the satisfaction of the United States.

It was said at the state department that the seizures probably would be the subject of further correspondence soon. Secretary Lansing is of the opinion that there is no precedent which would uphold Great Britain's attempt to justify the seizure on the ground that the men had engaged in plots in the far east, and were on their way to Manila to continue their efforts against the allies.

The position of the United States is that subjects of a belligerent government may not be removed from an American vessel on the high seas—even though they properly may be considered military persons but not actually members of the armed forces.

The note was made public by the state department. It follows the line of argument previously indicated, and contends that the persons were not clothed with the immunity which would attach to enemy subjects who merely were traveling.

Great Britain alleges that the prize-catchers were engaged for some time past in the collection and transmission of arms and ammunition, both for clandestine transmission to India and, if possible, for the arming of a ship to play the part of a far eastern Moewe, and were bound for Manila to continue their work, having been exposed to the British authorities at Shanghai.

The neutrality of the United States would have been compromised, the note contends, had the prisoners performed the acts they had in contemplation. Their acts, it is contended, deprived them of protection from the American flag, under which they were sailing.

The British government argues that the removals were perfectly justified and trusts that the United States will not feel further disposed to contend the action.
